Console	Modern Endpoint Protection	Server Security	Advanced Threat Defense	Full Disk Encryption

Protect your company computers, laptops and mobile devices with security products, all managed via a cloud or on-prem console. The solution includes advanced threat detection technology, preventing new, never-before-seen types of threats, and full disk encryption capability for enhanced data protection.

HOW YOUR ORGANIZATION WILL BENEFIT

- Improved protection against ransomware and zero-day threats via cloud-based sandboxing technology.

- Helps comply with data regulations thanks to full disk encryption capabilities on Windows and macOS.

- Easily accessible ESET PROTECT Cloud console improves TCO of security management.

- Single-pane-of-glass remote management for visibility of threats, users and quarantined items.

- Company endpoints and mobiles are protected via advanced multilayered technology, now with brute-force attack protection.

ESET SECURITY SERVICES

Works together with your ESET endpoint security products to deliver a complete solution by reinforcing your IT security team with on-call support from ESET experts, who are ready to help if any security issues arise.

A FULL SPECTRUM OF CAPABILITIES

ADVANCED THREAT DEFENSE WITH CLOUD SANDBOXING TO PREVENT RANSOMWARE

ESET LiveGuard Advanced provides proactive protection against new, never-before-seen threats, by executing all submitted suspicious samples in an isolated and powerful cloud sandbox environment, in order to evaluate their behavior using threat intelligence feeds, ESET's multiple internal tools for static and dynamic analysis, and reputation data.

- Advanced unpacking & scanning
- Cutting-edge machine learning
- In-depth behavioral analysis
- Cloud sandboxing

MULTILAYERED ENDPOINT PROTECTION INCLUDING SERVER SECURITY

ESET Endpoint Security provides strong malware and exploit prevention and can detect malware before, during and after execution. Now it also features anti-password guessing technology.

ESET Server Security provides lightweight multilayered server protection, to ensure business continuity.

- Block targeted attacks
- Prevent data breaches
- Stop fileless attacks
- Detect advanced persistent threats

POWERFUL ENCRYPTION MANAGED NATIVELY BY ESET PROTECT

ESET Full Disk Encryption is a feature native to the ESET PROTECT console. It allows one-click deployment and encryption of data on connected Windows and Mac endpoints. ESET Full Disk Encryption significantly increases your organization's data security and helps you comply with data protection regulations.

- Manage encryption on Windows and macOS machines
- Encrypt system disks, partitions or entire drives
- Deploy, activate and encrypt devices in a single action

CONSOLE—ESET'S UNIFIED PLATFORM INTERFACE

ESET PROTECT is a cloud-based or on-prem multifunctional remote network security management tool for ESET business security products across all operating systems. It enables one-click security deployment and the cloud console gives you network visibility without the need to buy or maintain additional hardware, reducing total cost of ownership.

- Seamless setup and deployment
- Cloud deployment does not require additional hardware or software
- Single point of network security management
- Saves time with automated tasks

About ESET

WHEN TECHNOLOGY ENABLES PROGRESS, ESET® IS HERE TO PROTECT IT.

ESET brings over 30 years of technology-driven innovation and provides the most advanced cybersecurity solutions on the market. Our modern endpoint protection is powered by unique ESET LiveSense® multilayered security technologies, combined with the continuous use of machine learning and cloud computing. Backed by the world's best threat intelligence and research, ESET products offer the perfect balance of prevention, detection and response capabilities. With high usability and unparalleled speed, we are dedicated to protecting the progress of our customers, ensuring maximum protection.
